### Roof Inspection:

Based upon my inspection as a qualified Roofing Contractor, having proper license and authority in the state of Illinois, find no major roof deficiencies. There was no evidence of leaking based upon my inspection.

Roof Inspections are accomplished by a licensed Roofing Contractor observing visible elements while walking over the roof surface. The inspector is concerned only with what he can see at the time of inspection. The inspector is only able to visually inspect the roof.

The roof is in satisfactory condition and should have several years with no leaking on roof deck or around skylights.

Severe weather and unforeseen problems such as wind driven rain cannot be accounted for.

I was unable to access the attic, as there is no attic space.

This certification does not warranty nor guarantee against any leaks on roofs inspected. All inspections are done visually
